Publications

MAEBE: Multi-Agent Emergent Behavior Framework

Developed framework for analyzing emergent behaviors in multi-agent systems, focusing on safety and alignment in complex AI environments

Accepted: HICSS Trustworthy AI Track, ICML Multi-agent Systems Workshop

Evaluating LLM Agent Adherence to Hierarchical Safety Principles

Lightweight benchmark using gridworlds for evaluating LLM agent ability to uphold high-level safety principles when faced with conflicting lower-level instructions

Accepted: ICML Technical AI Governance Workshop (Oral Presentation)

Research Experience

MIT Algorithmic Alignment Lab

Al Safety Researcher

June 2025 - October 2025

- Collaborated with Dylan Hadfield-Menell and Stewart Slocum (Anthropic Fellow) on character science.
- Developed open source character training pipeline increasing consistency by 15% over prompted baseline

Alignment Research Fellowship (AI Safety Global Society)

Mentor

April 2025 - July 2025

Mentored cohort of researchers on empirical alignment techniques and safety evaluations with ARENA

Carnegie Mellon - Chimps Lab

AI/HCI Researcher

May 2022 - April 2023

• Developed crowd-auditing framework (WeAudit) to identify robustness failures in AI models, focusing on bias

Industry Experience

Watertight AI

Technical Staff

November 2025 - Current

Building AI safety tech for major labs with CEO Aengus Lynch

Sitewiz (exited to GAIN)

Founder / CEO

November 2023 - May 2025

Built autonomous AI agents for web development, analytics, and UI/UX automation for leading CRO agencies

NullSpace

Al Engineer

March 2023 - July 2023

Developed LLM-powered interfaces to simplify blockchain adoption for new users.

Harness

Machine Learning Intern

May 2022 - August 2022

• Implemented time-series forecasting models for cloud cost projection and anomaly detection

Technical Skills

- Alignment Research: Empirical alignment, alignment stress-testing, safety evaluations, multi-agent systems
- ML Engineering: PyTorch, TensorFlow, LLM fine-tuning, reinforcement learning, transformer architectures
- Production Systems: Python, AWS, distributed systems, MLOps, autonomous agent deployment

Education

CARNEGIE MELLON UNIVERSITY, School of Computer Science

December 2024

Bachelor of Science in Artificial Intelligence | QPA 3.69

Recognition

- Winner, AI Safety Action Competition | European Network for AI Safety, 2025
- USAMO qualifier | The United States of America Mathematical Olympiad
